

**Please amend the specification as follows:**

**Title of the invention: Please replace the present title with the following:**

B1 "System for organizing information in 3D space"

**Please replace the presently pending paragraphs with the respectively numbered paragraphs below.**

B2 [01] This invention relates to a user interface for displaying, ~~organising~~ organizing, and interacting with information sources.

B3 [02] With the growth in volume and complexity of computerised information, user interfaces for ~~organising~~ organizing and displaying that information in such a way as to enable a user to navigate, work with and alter that information have become gradually more important. Perhaps the most commonly used interface at the present time is Windows® made by Microsoft, of Redmond, WA. In particular, for complex file management the most commonly used program is Windows® Explorer, which displays a hierarchical customisable list of files on a computer. Although this program functions well, information can only be displayed in a form which represents literally the directory structure in which such data is stored and it is not readily customisable.

B4 [11] According to a first aspect of the present invention there is provided computer apparatus for use in accessing and ~~organising~~ organizing information sources, comprising:

A module for generating a graphical output on a display, the graphical output depicting a plurality of nodes;
